Tanquille Farm
Kamloops, BC

Cost:

\$75/person (+tax)

Learn the skills to design and build your own water harvesting system

This workshop will provide you with the skills to help you understand, design and build your own basic water harvesting system. This course is packed with simple tips and tricks to get you started.

Topics covered will include:

- **Benefits of Water Harvesting**
- **How to calculate and size your system**
- **How to build a simple DIY rain barrel**
- **How to protect your site from Drought and Fire**
- **Techniques for harvesting water for Farm and Garden**

Bonus: We will be constructing a DIY Rain Barrel! Learn how to make your own, including exactly what parts to buy and how to install your new barrel.

***Join us and learn to Reduce your Irrigation Costs and
Grow Happier Healthier Crops with Rain Water
Harvesting!***
